BeePRM – Business Process Resource Management

BeePRM is a suit of applications that instantly adds an easy to use resource planning solution to your organization. The application is implemented as a highly user friendly rich client that is used in a manner very similar to Excel. It is multilingual, multi user and internet enabled.

Resource Detail Planning

The resource detail planning allows for high level deployment planning of a single resource at a time. It is also possible to allow the users to do self planning (single resource grant). The plan may include any mix of standard activities and projects. The planned values can also easily be exported to Excel for further processing.

Capacity Planning

The capacity planning works similar to the resource detail planning but provides an overview of all resources of a team on one screen. It is also possible to do a resource neutral planning on team level. The team level plan can later be detailed down to individual resources of the team.
